

BEEP CONTROL

BPSET

This program is used to toggle the HP28S beep function. By executing this program the beep (sound) on the 28S will either be turned on or turned off depending on what it was prior to the program being executed. BPSET also displays a message informing the user of the current beep setting.

```
BPSET
«
  IF 51 FS?
  THEN 51 CF
  " ** BEEP ON ** "
  4 DISP .2 WAIT CLMF
  ELSE 51 SF
  " ** BEEP OFF ** "
  4 DISP .2 WAIT CLMF
  END
»
```

'beep'

<<

```
IF 51 FS?
THEN 51 CF "ON"
ELSE 51 SF "OFF"
END 1000000 #1BB44
SYSEVAL
>>
```
